

MINH HA DUY LE

SOFTWARE ENGINEER

Tel: (678) 435 -2134 / leminh9844@gmail.com / <https://minhle28.github.io/>

Dear Hiring Manager,

I am writing to apply for the Software Engineer position. I am a Computer Science major student at Georgia State University (GSU) who has developed a passion for web development and software engineering. For the past 4 years, I have been learning and perfecting a wide spectrum of skills that are pertinent to software engineering such as: React, HTML/CSS/JavaScript, Java, PHP, and MySQL.

One of the projects I have worked on at GSU where I was in charge of the software is GSU ReviewHub. This is a system which aggregates course reviews based on input from students. The project uses front-end and back-end technologies and I am an active member of the project where I implemented my knowledge in user authentication and loading data from a MySQL database. This project and my experiences have been very insightful as well as fun, as I have a team of people from different backgrounds working together. These experiences are crucial in not only becoming technically proficient, but also in forming good collaborative work skills.

I have also gained some practical experiences in working life, I have done jobs as Data Entry and as a Cashier. At VN Accounting 2 Tax, I have perfected various elements of data management such as efficiency, policy and organisation and I managed to increase their efficiency by 30%. At KG Fashion Superstore, I have demonstrated to both customers and managers that I have abilities in customer service, maintenance of sales record, and other skills in organising stock.

With proven technical capability, I have the knack for identifying key issues that drive results. Through my engagement with key stakeholders and attention to detail, I believe I will be a highly productive member of your organisation.

I hope you will find the enclosed resume of interest in considering me for the position described. I appreciate the opportunity to explore with you how my experience and skills might meet your needs.

Sincerely,

Minh Le
