MINH HA DUY LE
SOFTWARE ENGINEER

Tel: (678) 435 -2134 / leminh9844@gmail.com / https://minhle28.github.io/

Dear Hiring Manager,

I am writing to apply for the Software Engineer position. As a Computer Science student at Georgia State University (GSU), I have developed a strong passion for web development and software engineering. With a comprehensive skill set encompassing React, HTML/CSS/JavaScript, Java, PHP, and MySQL, I am eager to contribute my expertise to your innovative team.

Throughout my academic journey at GSU, I have led several impactful software projects. Notably, I spearheaded the development of GSU ReviewHub, a dynamic course review website. Leveraging my proficiency in front-end and back-end technologies, I implemented key functionalities such as user authentication and dynamic data retrieval from a MySQL database. These projects have not only enhanced my technical capabilities but also fostered my collaborative skills within multidisciplinary teams.

Outside of academia, I have gained valuable practical experience through roles in Data Entry and Cashier positions. At VN Accounting & Tax, I streamlined data management practices, improving efficiency by 30%. Meanwhile, at K&G Fashion Superstore, I demonstrated my proficiency in customer service, sales record maintenance, and stock organization.

As a proactive and results-driven individual, I am excited about the opportunity to bring my blend of technical expertise and project management skills. I am confident that my hands-on experience and dedication to excellence will make me a valuable asset to your team.

Thank you for considering my application. I am eager to discuss how my skills and experiences align with the needs of your organization. Please find my resume attached for your review.

Sincerely,
