PROJECTS

GSU REVIEWHUB | A COURSE REVIEW WEBSITE   April 2024

- A platform dedicated to simplifying course reviews and discovery at GSU.
- Implemented key functionalities such as Authentication, User/Admin Dashboards, and dynamic data retrieval from a MySQL Database.
- Users can seamlessly interact with the platform, leaving comments on courses, while administrators can efficiently manage data through Excel uploads.

HANDWRITTEN DIGIT PREDICTION | A WEBSITE   April 2024

- Led a team of 3 in developing a handwritten digit recognition website. Achieved the key functionality of accurately predicting handwritten digits from images, employing iterative model training and rigorous experimentation to optimize performance and reliability. Deployed the website on Oracle Cloud to make it accessible to users.

BAD HABITS WEB | AN E-COMMERCE WEBSITE   Nov 2023

- Developed a full-stack e-commerce platform with ReactJS and MySQL Database, engaging a team of 5 contributors.
- Achieved key functionalities, including Authentication, and User / Admin Dashboard.
- Implemented dynamic data retrieval from the database, enabling seamless display and management of items on the dashboard, contributing to a 20% increase in overall platform traffic.

LEAF CHAT | A MOBILE CHAT APP   Dec 2022

- Developed a React Native mobile app using Firebase and Expo, featuring Firebase Authentication for user security, avatar customization, and global messaging.
- Conducted a successful demo with a 2% increase in user engagement, showcasing the app's functionality and user-friendly interface.
